Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since 2024. The carbon emission reduction achieved by these schemes equate to 8.1 tCO₂e, a 31%ge reduction against the 2022 baseline and the measures will be in effect when performing the contract.

- Introduced solar panel incentives for employees to reduce their personal and work from home emissions.
- Moved our hosting to 100% renewable energy.
- Encouraging use of solar battery technology to reduce the work from home carbon footprint of employees.

In the future we hope to implement further measures such as:

- Move more online services to suppliers powered by renewable energy.
